## Objective

Seeking a position as a **Software Engineer** in a **technology-driven** organization with an environment that encourages **innovative** & **creative** thinking.

## Career Summary

I am a Computer Science graduate and a **Full Stack JavaScript** Developer. I have been working on **Web Application Development** for more than **five years**.

I have worked on **ASP.NET Web Forms Applications, ASP.NET MVC, Windows Forms Applications, Windows Phone Applications, WPF applications, and SQL Server 2008-14**. And for sure, whatever I've developed in **.NET** framework, I've used **C#**. I use **GitHub** as my primary repository provider.

For past three years, I've been working with React with **Flux** and **Redux** architecture on the **Frontend**. I've used **REST API** framework **FeathersJs** in Backend. And I'm started loving working with **JavaScript** everywhere!

Also, I am used to with hosting **Full Stack JavaScript** apps in **Azure, Aws Beanstalk, Heroku Google Firebase** and more with **Build Automation, Continuous Integration**.

### Here is my online presence:

- <http://share.mushfiqweb.com/GitHub>
- <http://share.mushfiqweb.com/Portfolio>
- <http://share.mushfiqweb.com/Stackoverflow>
- <http://share.mushfiqweb.com/ReactPlayGround>

## Expertise

- ReactJs (3 years plus)
- React Router v3,v4
- Redux (1 year plus)
- ASP.NET C# (5 years plus)
